

ANTI WRINKLE INJECTIONS

REDUCTION AND PREVENTION OF WRINKLES

John Essa offers Anti-Wrinkle injection treatments which are beneficial in assisting with reduction and prevention of wrinkles. Anti-Wrinkle injections block signals from nerves to the muscles, causing them to relax therefore reducing their appearance. Injections also prevent wrinkles by stopping muscles from contracting. Results are often fast and although not permanent, they are long lasting

Treatment area	Product B

DERMAL FILLER

Add volume, contour and reduced appearance of wrinkles

Dermal filler is designed to add volume, lift and symmetry to your face, giving you a refreshed and natural appearance. The most common application of Dermal Fillers is to lips and cheek bones, giving them a more plump, smoother look. Dermal fillers can also be applied to the lower corner of mouths (marionette lines) and the area between each edge of the nose to top corner of mouths (nasolabial folds) to correct fine lines, smooth deep creases, restore volume and even reshape the chin and jawline.

Treatment area
